Forty Tons of Ore a Day Are Run Over the Coarse

After considerable experiment, the to ton dry concentrating plant of the Mistletoe Mining company at Kelly. N. M., has proved a success. The ore treated was a complex sulphide carbonate lead ore in a timestone gangue. Heads ranging from 4 to 8 percent were concentrated to 47 percent. The

tallings averaged less than 1 percent.

The crushing machinery of the mill consists of a crusher and coarse and fine roll:. The corase table has an average capacity of 100 pounds of concentrates an hour, and the fine table 250 pounds. Forty tons of ore have been run over the coarse table in 24 hours. The mill cost approximately \$20,000 and is run by a 45 horse power steam plant. It is expected that several mills of this type will be erected

Lynchburg Property Bouded. The Lynchburg property consisting of seven claims has been bonded by the American Zine and Lead company, an initial payment of \$5000 having been made. The Lynchor- and the Magdalena Tunnel company's claims have been consolidated with the Mistletoe Mining company (Gordon and Matthews, owners), and the new manage-ment will erect a 150 ton dry concentrating plan of the type of the present Mistletoe mill. A ton lot of Leawville ore has been shipped to Kelly for a

New ore bins have been built for shipping concentrates.

TO RESUME WORK ON PARRAL MINE

Pumps Arrive for Guadalupe-Parral-New Mill at Guadalupe.

Parral, Mexico, Jan. 4.-The Guadaground arranging things for an early start, probably about the 10th of January. Operations stopped about six months ago for various causes. A shipment of material is on the road including two large pumps and upon the in-stalation of these, work will be re-

The Mina Maria at Ronces Valles made a strike last Saturday when finishing tons of black powder are made into a crosscut to cut the Giralda vein from the charge and it is fired by means of the Maria workings. Miners cut three feet of ore assaying 800 grams several thousand tons of rock are pu-silver and 15 grams gold. There is thefore the shovel to be hauled to the dumping grounds. The shovels will

A New Mill.
Thomas E. Mackenzie, of Glasgow, Scotland, a director of the West Mexican mines, limited, owning the fa-mous Rosario mine in the Guadalupe y Calvo district says the first carload of machinery from Tampico has arrived for the erection of the 500 ton daily capacity mill. The shipment consists of 600 tons of material; all sectionalized for muleback transportation. The distance overland from the Oilto station is 220 kilometers and means a 12 day trip for freight mules and a five day trip for travelers,

Progress on Tepehuan. The shaft to the Tepebuan Mexican ompany mine is down about 150 feet and work progressing daily. Work was started the end of Jay this year and in September a holst plant was in-stalled consisting of two 25 horse power bollers. From the 150 foot level two drifts have been started running north | the most reliable advices received this and south. This property is situated

geles property of the Stallforths, near the town of Guadalupe y Calvo. Fred Stone is in charge.

Smelter Abandoned. The Compania Minera de Naica, operating in the Naica camp, state of Chihuahua, has just entered into a contract with the Torreon smelter for the treatment of its ores. The contract means the abandonment of the Naica company's plans for the erection of a company's plans for the erection of a 500 ton smelter at Concho station, which was decided upon some time ago and a building fund started. It was expected to invest close on to 1,000,000 pesos in the proposed plant. The Naica mines are now producing about 300 tons of ore daily, but this production can be very materially increased.

Failure of Mexico Consolidated Plan. The recent reorganization suggested by the committee of stockholders of Smelting company; has fallen through. In a circular sent the stockholders from Boston the committee announces that out of a total of 240,000 shares only holders of 85,000 shares deposited their stock under the reorganization plan. There seems to be no likelihood of an early settlement of the congested affairs of this company. The firm of Iwonsky and Grohmann, of Guanacevi, has attached the property for goods rendered to the amount of about \$25,000 Federico Stallforth resigned as president of the company on the 15th, as did Alberto Stallforth as treasurer and director, and both are now negotiating with the other officers in Boston for a settlement of the \$300,-000 due the firm of Stallforth y Her-
